

SIMON BUSINESS SCHOOL CLUB EVENT REQUEST & EXECUTION GUIDE

For Student Leaders

This guide outlines all expectations, processes, and required actions for planning and executing a club event through the Office of Student Life. It is your responsibility as a club leader to carefully review and follow each step listed below. Failure to adhere to this guide may result in delays, budget denials, or event ineligibility.

Event Submission Timeline

All events must be submitted via SimonSource at least 21 days before the event date. This applies to both on-campus and off-campus events, and to both free and paid experiences. Events submitted fewer than 21 days before the intended date may not be approved. Do not promote or assume approval for an event until it is formally approved in SimonSource.

What to Include in Your SimonSource Submission

Each SimonSource request must include a complete set of event details: title, date, time, location, event description, target audience, expected attendance, tech needs, food plans, and full budget (including funding sources and spending estimates). For off-campus events, include venue contact information. If requesting merchandise or alcohol, indicate this in your submission. For virtual or hybrid events, provide Zoom or online platform details.

Payment Page Protocol (If Applicable)

If your event includes a registration fee, a payment page must be created and used for registration. Students will not register directly on SimonSource. Instead, event details will be posted on SimonSource with a link to the payment page. Students must complete the payment process through the designated link. Once they do, they will be added to the SimonSource attendee list. If the event reaches capacity via the payment page, and you wish to open a waitlist on SimonSource, notify OSE to configure this. Events cannot charge fees or collect payment through external tools such as Venmo, Eventbrite, or Zelle.

Event Check-In Requirements

All events must use SimonSource for student check-in. You will receive a QR code for check-in once your event is approved. This QR code must be displayed and used at the event to verify attendance. This is required for funding tracking, compliance, and Net Impact records.

Food Arrangements and Business Card Policy

If you plan to use the OSE business card to order food, you must coordinate with your OSE advisor (Gina Ignatti, Brittany Grage, or Kam McMillian) at least 72 hours before your event. OSE can assist in placing orders for delivery only. Food pickups are not supported by the OSE team. If your event requires exceptions to this policy due to timing or format, reach out well in advance to discuss options. Food purchases without advisor coordination will not be permitted on the business card.

Reimbursement Policy

All reimbursements require prior written approval. If you or another club member plan to make a purchase with personal funds and seek reimbursement, you must submit a reimbursement request form at least 72 hours before the purchase is made. The request must be specific and include expected cost, item purpose, and justification. Unapproved purchases will not be reimbursed under any circumstances. It is the responsibility of the club's VP of Finance to ensure all expenses are tracked, allocated properly, and match the submitted budget.

Slack Posting Guidelines

Determine the appropriate audience for your event before posting in Slack. If the event is intended only for current club members, post only in your club's channel. If the event is intended for students in a specific program, post only in that program's Slack channel. If the event is open to the full Simon community, post only in the #events channel. Do not post the same event in multiple channels. You are limited to three total posts in #events per event. Of these three, only one may be on the day of the event. This rule is enforced to reduce Slack spam and promote more meaningful engagement.

Technology and IT Support

If your event requires AV equipment or IT support, plan to arrive early to your event space. You are responsible for ensuring your tech needs are addressed before the event begins. If needed, use the classroom phone to contact the IT Help Desk. OSE staff will not be available on-site to troubleshoot. This includes setting up microphones, projectors, Zoom links, or hybrid components.

Merchandise Requests

If your club would like to include Simon merchandise at an event, you must complete the Simon Merch Request Form at least three business days before the event. Once the request is processed and fulfilled, you will receive an email with pickup instructions. Some merchandise items may be charged to your club account, depending on quantity and item type. Unclaimed merch may be redistributed to other events at OSE's discretion.

Alumni Attendance Notification

If you noted in your event request that alumni will be present, you must confirm names and graduation years as soon as alumni attendance is finalized. This information is required so that Simon Advancement can maintain accurate alumni engagement records. If alumni are invited but not yet confirmed at the time of submission, you will be asked to follow up prior to the event date.

Financial Splits Between Clubs or Departments

If the cost of your event is being shared across multiple organizations, it is your responsibility to indicate this in the SimonSource form and to ensure the split is recorded internally by your club's VP of Finance. OSE will not coordinate internal budget records between groups. Each club must account for its portion of expenses in its own financial documentation. Be sure to include all co-sponsors and confirm that your budget submission reflects the correct funding split.

Events Involving Alcohol (Off-Campus Only)

If your event is off campus and includes alcohol, you are required to complete additional steps. At least seven days before the event, the club board member must email the Student Life team

(Brittany Grage, Kam McMillian, Gina Ignatti, and Alex Wilks) with the venue's point of contact and confirm that the location complies with Simon policies. Additionally, you must email all registered attendees before the event and copy the Student Life team, reminding them of Simon's Alcohol Policy and the venue's rules and expectations. These emails must be sent even if alcohol is not the primary focus of the event.

Net Impact Form Submission

Each club is responsible for submitting the Net Impact Form within one week after their event concludes. Submitting the form is required to be eligible for end-of-year funding awards and recognition. One form must be completed per event, regardless of size or scope.

Communication Expectations

OSE communicates approvals, deadlines, follow-ups, and documentation requests via email. You are responsible for monitoring your inbox, responding in a timely manner, and taking action on any required deliverables. If any aspect of your event changes, such as timing, format, cost, or venue, you must notify your OSE advisor immediately. Event changes without notice may result in revoked approvals or budget penalties.

This document reflects current Simon Business School policy as of the 2024–2025 academic year.
